Organising Secretary, LOS Symposium

5th Annual Symposium OF LUCKNOW ORTHOPAEDIC SOCIETY

(In Collaboration with Department of Orthopaedic Surgery, KGMU, Lucknow)
(Under the Aegis of UP Orthopaedic Association)

Dear Esteemed Members,

As you are aware, the Lucknow Orthopaedic Society (LOS) proudly conducts its Annual Symposium every year, bringing together orthopaedic surgeons, academicians, and trainees for meaningful academic exchange and professional growth.

We are pleased to announce that this year's LOS Annual Symposium will be held on 29th March at the 8th Floor Auditorium, Shatabdi Hospital, King George's Medical University (KGMU), Lucknow. a prestigious NAAC A++ accredited medical university of national repute.

The Theme of the symposium would be **“Basic to Complex Injuries Around the Elbow – Learning for Everyone”** The scientific program has been thoughtfully curated to comprehensively address:

- Fresh trauma (Adult and Paediatric)
- Neglected injuries
- Complications and their management
- Unusual and challenging case presentations

The symposium aims to bridge fundamental principles with advanced surgical strategies, ensuring that both young surgeons and experienced practitioners benefit equally from the academic deliberations.

A special highlight of the meeting will be a hands-on workshop focusing on:

- Anatomical Locking Compression Plate (LCP) fixation of intercondylar fractures of the humerus
- Surgical fixation techniques for olecranon fractures

This practical training module is particularly designed to enhance surgical understanding and technical confidence, especially among young and practicing orthopaedic surgeons.

The upcoming LOS Symposium promises to be an excellent opportunity to learn, update knowledge, exchange ideas, and understand contemporary concepts in the management of elbow injuries. It will also serve as an important platform for academic interaction and collaborative learning.

We warmly invite all members and colleagues to actively participate in this academic gathering. Your presence and contribution will not only enrich the discussions but also make this event a grand success.

We look forward to your enthusiastic participation

Dr. Ashish Kumar
